September Meeting Topic:

“Water for Wildlife”

Water for birds and other wildlife is essential for drinking, bathing, and in some cases, for reproduction. Combined with food, shelter and places to raise young, the addition of water or a rain garden to the landscape can qualify home owners or businesses for official wildlife habitat certification with National Wildlife Federation.

Come find out how your family can be a part of our community-wide effort to certify Charlotte as a community wildlife habitat.

Please join us on Thursday, September 18th, 7PM, at Queens University

Free event, Free parking!
